

Instruction Manual for Mount Base for Electric Type 89

This mount base is only for MARUI electric 89 formula systems. It can attach firmly easily, without processing it into a frame. Pro Sight II (option) of a MARUI option part can be attached by the attached mount ring or Offset High Mount (option). Moreover, in case a Pro Scope (option) is attached, an M4A1 High Mount Base (option) is set and used.

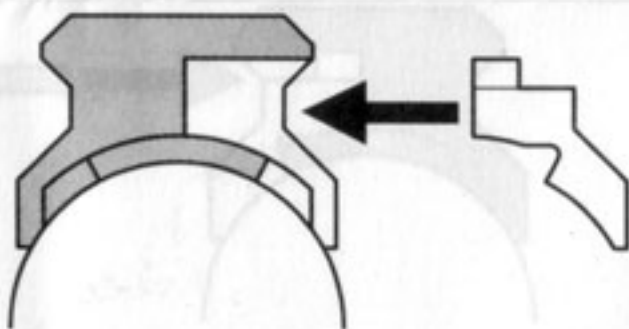

● The method of attachment

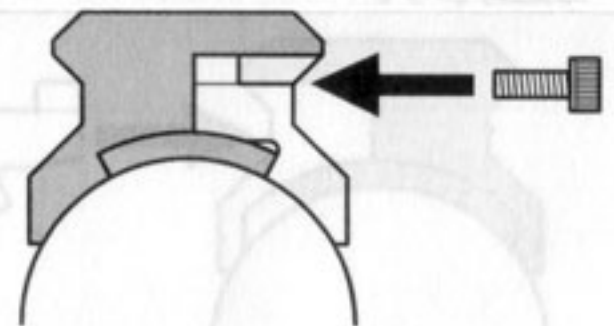

- ① The check of an attachment position.
Check that the dent part of the portion and the attachment base containing a joint part is in agreement.
- ② Attach setting the hook of a mount base by the mount attachment base of the main part of a gun.

- ③ Face across the main part attachment base by the joint part.

- ④ Fix firmly using an attached screw.

⚠ Caution

This mount base can't be attached in an order contrary.
