

# Instruction Manual for Left side Custom Selector for Electric Type 89

## The contents of a set

Left side Custom Selector

Screw X 1  
(2X14)

Hex wrench (1.5m/m)

## ● The method of attachment

※ Work making a selector position into <math>\langle \text{ア} \rangle</math>.

- ① The screw is loosened and a Selector Index is removed from an electric cancer main part. (The selector index and screw which were removed are not used. It is kept so that it may not lose.)

- ② The left side selector is attached.

**⚠ Caution**

Attach according to the slot on the gun.

**⚠ Caution**

The left selector clings to a gun in the position of 90°.

- ③ Use an attached screw and fix firmly.

**⚠ Caution**

Be careful for fastening too much.
